**Disconnection of Sewer Lateral that will be used again:**

Cut and cap the sewer lateral at the customer side of the curb cleanout.

**Customer will continue to receive a monthly service charge bill until reconnected and then will be billed based on water consumption.**

**Disconnection of Sewer Lateral that will NOT be used again:**

Lateral to be completely removed from the sewer main. A stainless steel repair clamp of the appropriate size must be used to seal the opening. Any remaining section of lateral that is to be abandoned in place must be capped and concreted in place somewhere on the customer's property. Drawings of all changes must be supplied at the completion of the job; these drawings must include a minimum of two ties per feature.

**Once outstanding balance on account is paid in full the account will be inactivated and monthly bills will no longer be generated for this property.**

**Disconnection of Water Service line that will be used again:**

Cut and cap the water service at the customer side of the curb stop valve.

**Customer will continue to receive a monthly service charge bill until reconnected and then will be billed based on water consumption.**

**Disconnection of Water Service line that will NOT be used again:**

Shut off water at the corporation stop, cut and crimp the copper one foot from the main. Drawings of all changes must be supplied at the completion of the job; these drawings must include a minimum of two ties per feature.

**Once outstanding balance on account is paid, the account will be inactivated and monthly bills will no longer be generated for this property.**
